

Health Professions Advising Office Optometry School Academic Preparation

These courses meet the requirements for most optometry schools and for preparation for the OAT. Optometry schools generally do not accept AP credit or on-line courses for these required courses. **Be sure to check each optometry school's requirements.**

No optometry school requires a science major, nor are science majors given extra consideration in the admission process. Becoming a competitive optometry school applicant also requires more than a solid GPA and OAT score. **Be sure you are meeting regularly with your HPAO advisor.**
